

Interior design and visual communication support for residential professionals.

Alessandro provides flexible layout,
design-development and visualisation
support for architects, technicians,
builders, developers and renovation
suppliers who need clearer client-
facing material.

CLEARER DRAWINGS.
STRONGER VISUALS.
EASIER CLIENT DECISIONS.

LAYOUT STUDIES GROUNDED IN SPATIAL LOGIC

Layout studies are one of the studio's core services, shaped by a careful interest in how rooms connect and support everyday use.

For trade partners, this provides focused interior support before pricing, client presentation or design development.

SPARKES CLOSE LAYOUT SUPPORT IN PRACTICE

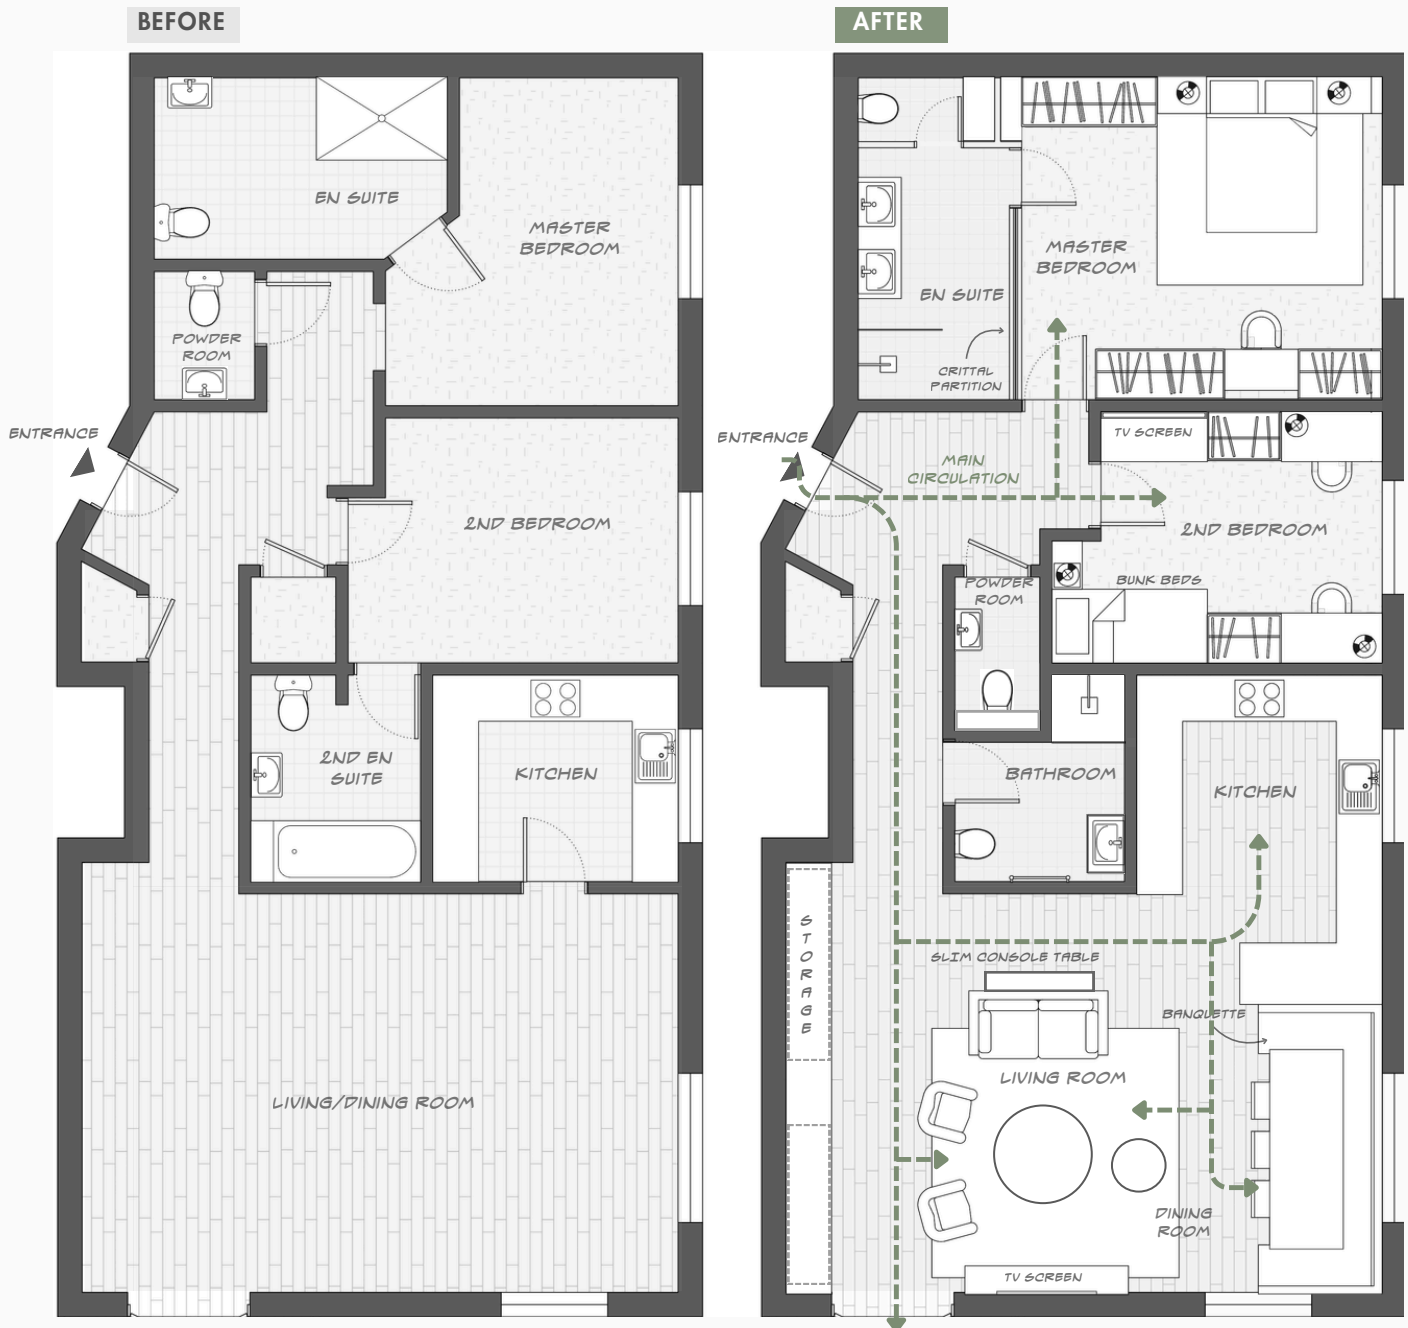

More spatial studies → afstudio.co.uk/spatial-studies

A loosely planned apartment layout was refined into a clearer, more usable arrangement with stronger circulation, storage, and room hierarchy.

Better spatial logic can strengthen perceived property value by making the home feel more resolved, usable, and market-ready.

FROM SPATIAL DIRECTION TO CLIENT-READY MATERIAL

Once the layout direction is clear, Alessandro can help develop the interior layer into material, drawing and visual information for pricing, presentation and client discussion.

Support can be commissioned as a focused package or combined around the needs of a live project.

01 MATERIAL & FINISH DIRECTION

Finish palettes and material direction considered around durability, maintenance, sourcing realism and everyday use.

02 JOINERY, STORAGE & ELEVATION STUDIES

Concept studies for wardrobes, shelving, media units, banquettes and storage walls, developed around the agreed spatial direction.

03 3D VISUALISATION & PRESENTATION MATERIAL

3D views, annotated visuals and presentation pages used to communicate the developed direction clearly to clients and project teams.
