Better decisions shape better spaces

Interior design for homes that need rethinking, not just redecorating.

Alessandro helps homeowners understand how a space could work before costly decisions are made — from layout and storage to visual direction and 3D visualisation.

COSTLY DECISIONS ARE MADE.

BEFORE YOU COMMIT, TEST THE DECISIONS THAT SHAPE THE HOME

Many renovations move forward before the layout, storage, furniture scale and room roles have been properly tested.

This can lead to costly changes, missed opportunities and homes that do not quite feel right.

A spatial study tests layout, storage, flow and room use before design or build decisions become expensive.

WHAT IT CAN CLARIFY

ROOMS
Open, separate or redefine with purpose.

STORAGE & FURNITURE
Place them where they support movement, comfort and use.

EVERYDAY FLOW
Test how rooms connect before decisions are fixed.

MATERIALS
Consider finishes for durability, upkeep, light and long term atmosphere.
